All of our products are handmade and made especially for you, with "love" and "devotion." Smell your best, Feel your best, this is Aroma.

SOAP

BATH BOMB

SUGAR SCRUB

AROMA PRODUCTS

Lovely, charming and sweet fragrances
– This is Aroma Cosmetics.

Our Lavender-scented soaps are shaped into sweet hearts especially for *you*. The lavender is a lovely scent and our soap will leave you feeling clean and fresh. The meaning of the name "Lavender" in the flower language is "devotion," (Brown) which we have put into our products to give you the very best.

Our bath bombs are scented with rose garden fragrance, which provides a therapeutic experience and allow you to unwind and relax after a day of hard work. Roses are famous for their romantic meaning of "love." The fizz produced in your bathtub will give you a nice ticklish feeling while emitting the sweet smell of roses in the air and coloring your bath a lovely shade of pink.

The sugar scrubs have a sweet smell of spring rain. This will exfoliate and rejuvenate your skin, leaving your skin feeling soft and new.

Aroma Cosmetics and Bath Products

Smell your best; Feel your best

Smell your best; Feel your best

Aroma body products are all natural
and nourishing replenishes your body,
mind and soul!

LAVENDER HEART SOAP

Ingredients List:

Sodium Oleate, Sodium Laurate, Sodium Palmitate, Sodium Myristate, Sodium Linoleate, Sodium Caprate, Sodium Stearate, Sodium Alpha Linoleate, Water, Glycerin, Lavender Essential Oil, Purple Color Pigment

Procedure:

1. Measure out olive, coconut, and palm oil
2. Add solid oils to crock-pot and allow it to heat up
3. Once solid oils had fully melted, add olive oil to mixture. Meanwhile, mix Lavender essence oil with coloring.
4. Mix in lye with oils once the oils are cooled. This causes the mixture to saponify, creating soap and glycerin. Mix until trace.
5. Mix in fragrance and coloring with hand blender.

The chemistry:

The oils found in the soap combine with the strong base, lye (NaOH), to create a reaction called saponification. Saponification is the chemical reaction between the oils and the lye that creates glycerin and soap. The way soap works is by making oil and water mix. The soap molecules break up the oil molecules when you rub it into the skin, and form around the oil molecule making its positive end attractive to water molecules, where it washes away. (Wood)

STAR ROSE BATH BOMB

Ingredients List:

Baking Soda, Citric Acid, Olive Oil, Rose Garden Essential Oil, Water, Pink Color Pigment

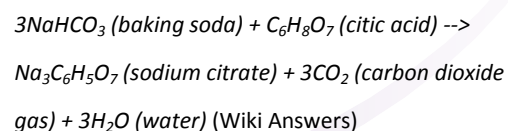

Procedure:

1. Combine together the baking soda and citric acid into a fine, well blended mix.
2. Add in fragrance, oils, and color. Mix it until it turns into the desired color, and the oils are nicely blended in as well.
3. Add a tiny amount of water, but not enough to make the mixture fizz a lot.
4. Fill in the molds with the mix and store in a cool place.

The chemistry:

The citric acid is used as a bonding material for the baking soda, so that the powders stick together when it is made into a bath bomb. There is a reaction between the citric acid and the baking soda (the acid and the base) that makes bubbles and fizzes when placed into water. (Mitchell) Baking Soda (NaHCO_3) and Citric Acid ($\text{C}_6\text{H}_8\text{O}_7$) would make up this reaction:

This produces CO_2 gas, which results in the bubbling and fizz. The fragrance and color are released as the bomb dissolves.

SPRING RAIN SUGAR SCRUB

Ingredients List:

Sugar, Olive Oil, Spring Rain Essential Oil

Procedure:

1. Take one cup of sugar and pour into bowl
2. Measure half cup of any desired oil
3. Mix
4. While mixing put 15 drops of essential oil
5. Continue mixing until consistent color and texture

The chemistry:

Sugar scrubs work because when rubbed onto skin, the fine sugar pieces gently removed the dead skin cells. Also this reveals the new layer of skin which undergoes a deep moisturizing process from the oils. This process will leave one having smooth, soft skin that is revitalized and renewed. (Harkins) Squalane is found in oils and is a great for dry skin. It is absorbed quickly by skin to moisturize. (Barclay-Nicholas)

ALLERGY WARNINGS

Contains OLIVE OIL and COCONUT OIL.
Contains ARTIFICIAL COLORS and FRAGRANCES such as Lavender, Rose, and Spring Rain.

PRICINGS

Lavender Heart Soap
❖ \$6/heart bar; \$5/square bar
Star Rose Bath Bomb
❖ 5 for \$3/\$1 each
Spring Rain Sugar Scrub
❖ \$3/jar
